## What does St Luke's Hospice Do?

St Luke's looks after people with cancer and other serious progressive illnesses, such as motor neurone disease and heart, lung and kidney failure. At St Luke's, no one is just a patient, and we never lose sight of the person behind the disease. We help people feel that they do matter, that they are cared for, and that they can still make a valuable contribution to the lives of those around them. The team at our Hospice help people live life to the full, for whatever time they have, no matter how long or short, at what is often an exceptionally difficult time. We focus on adding life to days, even when days cannot be added to life.

Care is provided at St Luke's either in our outpatient clinics or within day care, or within our 12-bed inpatient unit. However, as a result of feedback from local people, St Luke's now provides elements of its service to patients in their own homes enabling patients to remain in familiar surroundings rather than being admitted into hospital or to St Luke's inpatient unit. Services provided include 24-hour specialist clinical care along with social work and bereavement support, complementary therapies, physiotherapy, spiritual care, and art and music activities.

Everyone is welcome at St Luke's, whatever their race, religion, beliefs or lifestyle. Our clinical staff and spiritual care coordinator are specially trained to respect and facilitate the spiritual, religious and cultural needs of any patient or family.

We look after around 500 new patients each year. In addition, our Bereavement and Hospice At Home services provide 625 and 6,000 episodes of care respectively each year.

Last June, St Luke's celebrated its 21<sup>st</sup> Birthday. Our sole purpose is to serve our community, by offering free Hospice Care and with the support and contributions we have received from people like you, we can all agree that the founding of St Luke's is a true community story.

## St Luke's is a Registered Charity

St Luke's is not a NHS Hospital, nor an exclusive private facility; we are an independent charity and are proud to be able to offer all our services to patients and their families free of charge. This standard of care is expensive to maintain. With government funding under a third, in 2008 we need to raise an additional £2.5M to maintain our services of clinical excellence. We are increasingly reliant upon the generosity of our supporters; individuals, groups, companies and trusts to raise the additional funding. Put simply, we need to constantly raise funds and could not survive without help from people like you.

Over 80p of every pound of our income is spent on the costs of patient care.

If you would like any information about any aspects of the work at St Luke's, please contact us on 020 8382 8000 or visit us at [www.stlukes-hospice.org](http://www.stlukes-hospice.org)
