

Ask Brent Council to stop their development plans now!

Brent Council plans to build a controversial new development just 10 metres from patient bedrooms, and just 5 metres from the patients' gardens (pictured above).

St Luke's has been serving our local community for over 30 years. Last year we provided specialist end of life care to 1,628 people in Harrow and Brent.

Because of closure of beds at two neighbouring NHS Hospices we face a significant increase in demand for our care.

The noise and dust from building work of this magnitude, so close to rooms where people at the end of their life are being cared for, will give us no choice but to close at least one third of our in-patient services when it's needed most.

People at the end of life need highly specialist care.

If we are forced to close at least one third of the Hospice beds **#WhereWillPeopleGo?**
